

Letter Of Recommendation

In the 4 months of Irvin Rosales being here I can confidently say he has great skill when it comes to composing and orchestrating lively tracks. He is the lead composer for the series “Neon Chronicles” and created the main theme which is brilliant and tells a story itself. When given visual inspiration, or a theme for a track, he masterfully can interpret it and produce something that fits. Irvin creates symphonies and progressions that are memorable. The focus, speed and quality of his works is what impressed me the most. His work on Neon Chronicles is proof of his talent and I cannot wait to see where he goes in his music career. Communicating with him during pre-production has been great and I'm sure his notable works here will be seen by many. I look forward to continuing working with him as he continues to further his career as a musician.
